UNH ATHLETIC COMPLEX

Fielding a future history of success.

The University of New Haven has one of the most comprehensive athletic programs in the Northeast Region. Continually seeking to upgrade their offerings to ensure the best possible practice and game-day experiences, UNH entrusted Milestone over the past several years (2014-2017) to oversee improvements and enhancements to their north campus athletics complex. This multi-million dollar investment included new baseball field dugouts & bleachers; gymnasium renovations (floor refinishing, score board & shot clock replacement, roof replacement); electrical upgrades; maintenance & storage sheds; and improvements to the softball field press box.

Additional projects that significantly improved their programs included the addition of a lighted walkway that connects the locker room facilities (housed in the gymnasium building) to the DellaCamera stadium (and all points in between); new stadium lights that bring night practices and games to the school for the first time; along with 6 brand new tennis courts with lighting that support UNH's recently established tennis program.

Many of these projects were fast tracked during times when facilities and/or fields were not being utilized - that could mean off season or during windows that would allow for projects to take place with minimal disruption. Milestone coordinated all specialty trades and worked diligently to beat the buzzer with no interferences or penalties called; ultimately setting the stage for all programs to continue creating legacies of success.
